

## Summer Work

Dear Med Tech/Medical Assistant Student,

I am so excited about your choice to take Medical Principles and Practices/Medical Assisting (fondly referred to as Med Tech)! I promise you will enjoy using your Physiology Honors knowledge to embark on your first healthcare career – Medical Assisting!

Medical Terminology is the language of medicine. Knowing medical terminology will make learning clinical and laboratory procedures, charting so much easier! And, of course, you definitely know it helps you with anatomy and physiology concepts!

I will be posting links on edmodo. Please remember to create an account for yourself at [www.edmodo.com](http://www.edmodo.com) and the new class code will be b0ytnp. I will be posting your terminology as well as assignments to help you really learn.

The second item is I would like you to read a book on medical ethics, First Do No Harm by Lisa Belkin. You can check out a copy at school or the library. I will post questions for the book on edmodo and we will discuss the book the first week of school.

Please feel free to contact me at [denisea@provo.edu](mailto:denisea@provo.edu) or at 801-400-5600 (texting preferred) if you have any questions!

Sincerely,

Mrs. Abbott
