

Summer Work

Dear Physiology Honors Student,

I am so excited about your choice to take Physiology Honors! I promise that you will learn a lot about the human body, medical terminology and healthcare careers! It may be difficult for some of you on occasion, however, with regular study, good attendance, and some dedication, you will be amazed at what you will learn during the year!

Medical Terminology is the language of medicine. Knowing medical terminology will make learning Anatomy and Physiology so much easier! Your job this summer will be to learn some basic medical terminology. I will be posting your summer work on Edmodo. You will need to please go to www.edmodo.com and create an account. The Physiology Honors class code is s8hyf9. The first posting is the list of medical prefixes, root words, suffixes. This is your master list – please do not try to submit it! I will be posting assignments to this website to help you learn basic colors, procedures, organs, and directional terms!

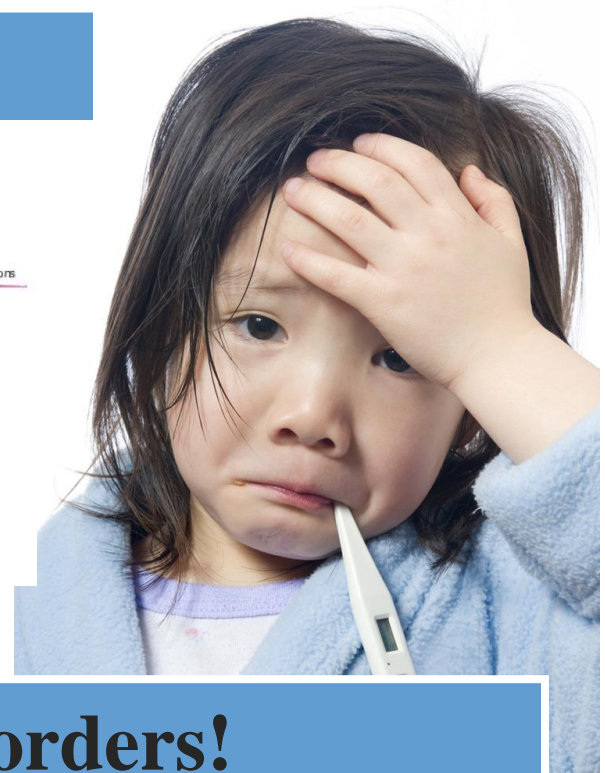

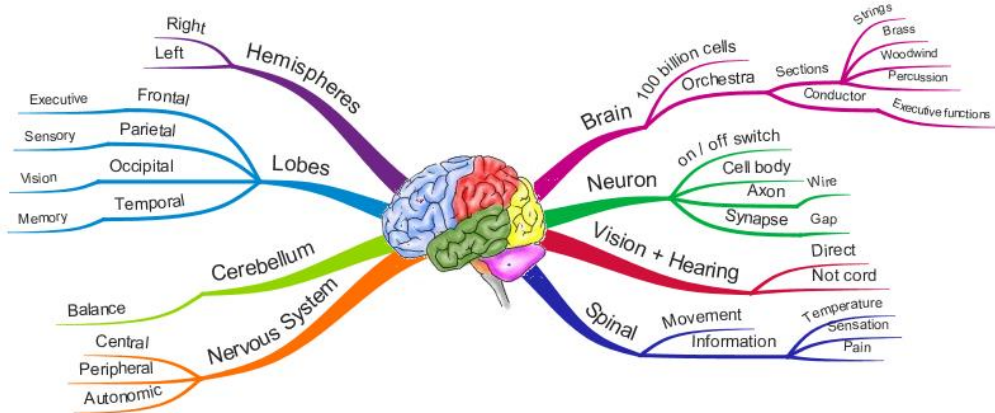

Please feel free to contact me at denisea@provo.edu or at 801-400-5600 (texting preferred) if you have any questions!

Sincerely,

Mrs. Abbott

Why take Anatomy and Physiology Honors?

Understand how the body functions!

Investigate Disease and Disorders!

Discover Anatomy!

IMPROVE MEDICAL TERMINOLOGY!
